## PROJECTS DEVELOPED

### Clozer (Web App) (06/2023 - 05/2024)

- Web application where music artists from Soundcloud, Spotify etc. can make their own platforms to advertise their latest tracks and news to their fans. Music artists were given an editor panel to customize their main page and add latest releases, and other stuff related to their career.
- Created using Next JS, React JS, Typescript, React Query was used to manage backend API calls, while Material UI was used as the main UI library.

### Dade Auctions (Web App) (06/2022 - 04/2023)

- Web application where users can buy/sell/auction products, this was developed using the tech stack Next JS, Typescript, Firebase and SASS. Used Axios for Rest API integration wherever data was being handled from backend.
- Users can place bids on products/buy products and view products sold by other users. User can create their own products and has access to a dashboard where they can view products/account details etc.

### Trakker Applications (Web Apps) (05/2021 - 06/2022)

- Used React JS, React Redux to make and maintain several accounting applications. applications were Escrow Trakker, Invoice 4 Business and TimeTrakker. Users can create bank accounts and add transactions in respective bank accounts.
- Redux Saga was implemented to receive and send data to backend, while Ant Design was primarily used for components related to the designs of the screens.
